Crime involving a computer and a network. Part of a series on. Information security.
Cybercrime, or computer-oriented crime, is a crime that involves a computer and a network.[1] The computer may have been used in the commission of a crime, or it may be the target.[2]

Cybercrime may threaten a person, company or a nation's security and financial health.[3]. There are many privacy concerns surrounding cybercrime when confidential information is intercepted or disclosed, lawfully or otherwise.
