Computer-assisted language learning (CALL), British, or Computer-Aided Instruction (CAI)/Computer-Aided Language Instruction (CALI), American, is briefly defined in a seminal work by Levy (1997: p. 1) as "the search for and study of applications of the computer in language teaching and learning". CALL embraces a wide range of information and communications technology applications and approaches to teaching and learning foreign languages, from the "traditional" drill-and-practice programs that Contemporary Computer-Assisted Language Learning (CALL) is a comprehensive, one-volume work written by leading international figures in the field focusing on a wide range of theoretical and methodological issues. It explains key terms and concepts, synthesizes the research literature and explores the implications of new and emerging technologies.The book includes chapters on key aspects for CALL such as design, teacher education, evaluation, teaching online and testing, as well as new trends such as social media. Computer Assisted Language Learning (CALL) is a system which aids learners to improve and practice language skills. It provides a stress-free environment for learners and makes them more responsible. As learners are the users of computer in their learning process, an investigation of the effectiveness of CALL is germane to understanding the perception of learners on the computer application in learning. Therefore, this research aims to tackle this issue and investigate the effectiveness of CALL in an ESL/EFL context in Malaysia. Computer Assisted Language Learning (CALL) In the mid 1960s, new Computer-assisted language learning (CALL) is an approach to language teaching and learning and the best way to learning in the future. Computer-assisted language Learning (CALL) is an approach to teaching and learning in which the computer and computer-based resources such as the Internet are used to present, reinforce and assess material to be learned. It usually includes a substantial interactive element. It also includes the search for and the investigation of applications in language teaching and
