The framework for local governance developed in this book represents a paradigm shift as it argues for top down mandates on local governance to be replaced by bottom-up compacts. Furthermore the role of local government is seen as a purchaser but not necessarily a provider of local services and to serve as a catalyst in network governance at the local level for developing social capital and improving economic and social outcomes. "World government" refers to the idea of all humankind united under one common political authority. Proposals for a unified global political authority have existed since ancient times in the ambition of kings, popes and emperors, and the dreams of poets and philosophers. Recently, some have argued that a world government is already here, or nascent in contemporary conditions of capitalist globalization. There is much debate about whether global institutional developments towards a world state are inevitable or contingent, stable or subject to reversal, and whether unifying economic and politic Modern Local Government is a unique assessment of local government reform from the perspective of both local and central government, which is fully informed by an analysis of the role of the European Union. A world government capable of controlling nation-states has never evolved. Nonetheless, considerable governance underlies the current order among states, facilitates absorption of the rapid changes at work in the world, and that direction to the challenges posed by interstate conflicts, environmental pollution, currency crises, and the many other problems to which an ever expanding global interdependence gives rise. In this study, nine leading international relations specialists examine the central features of this governance without government. They explore its ideological b
