

On Early English Pronunciation: With Especial Reference to Shakspeare and Chaucer : Containing an Investigation of the Correspondence of Writing with Speech in England from the Anglosaxon Period to the Present Day, Preceded by a Systematic Notation of All Spoken Sounds by Means of the ..., Volume 2, #Alexander John Ellis #Asher, 1869 #1869

On early English pronunciation, with especial reference to Shakspeare and Chaucer, containing an investigation of the correspondence of writing with speech in England from the Anglosaxon period to the present day, preceded by a systematic notation of all spoken sounds by means of the ordinary printing types. Including a rearrangement of Prof. Book digitized by Google from the library of University of California and uploaded to the Internet Archive by user tpb. Titles of v. 4 and 5 differ slightly, Vol. 5 has imprint: London, Pub. for the Philological society, the Early English text society, and the Chaicer society, by Trulbner & co., 1889. Paged continuously; v. 5 has also separate pagination. Writing as the symbolic representation of the language by graphic signs must be taught and learned through a deliberate effort. Thus the origin of the written language lies in the spoken one, but not the other way round. For a long time the linguistic research was based on the assumption that only the written form of language can serve an object of theoretical investigation. Written language usually has a generally accepted standard which is the same throughout the country. The spoken form of the lan-guage was considered not worthy of scientific analysis because of a great number of distinctio... Territorial differentiations in pronunciation of the language observed in the speech of the whole nation are called national pronunciation variants.
