

Signs of Life: Bio Art and Beyond

By Edward Kac

MIT Press Ltd. Paperback. Book Condition: new. BRAND NEW, Signs of Life: Bio Art and Beyond, Edward Kac, Bio art is a new art form that has emerged from the cultural impact and increasing accessibility of contemporary biotechnology. Signs of Life is the first book to focus exclusively on art that uses biotechnology as its medium, defining and discussing the theoretical and historical implications of bio art and offering examples of work by prominent artists. Bio art manipulates the processes of life; in its most radical form, it invents or transforms living organisms. It is not representational; bio art is in vivo. (A celebrated example is Eduardo Kac's own GFP Bunny, centered on "Alba," the transgenic fluorescent green rabbit.) The creations of bio art become a part of evolution and, provided they are capable of reproduction, can last as long as life exists on earth. Thus, bio art raises unprecedented questions about the future of life, evolution, society, and art. The contributors to Signs of Life articulate the critical theory of bio art and document its fundamental works. The writers -- who include such prominent scholars as Barbara Stafford, Eugene Thacker, and Dorothy Nelkin -- consider the culture and aesthetics...
