

Alternative Treatment for Cancer 363 pages Ping-Chung Leung, Harry Hong Sang Fong 9789812709295 World Scientific, 2007 2007

understanding of the alternative cancer prevention and treatment. means and mechanism. More in vivo mainly clinical trials are necessary. The effect of *L. acidophilus* 20,079. extracted EPS on colon is a promising therapeutic target for cancer. [91]. Cell wall components of *L. acidophilus* and *L. casei* act as anticancer substances [92]. There are many alternative cancer therapies available. The following descriptions encompass those which are most widely sought. There are additional therapies which we are adding on a second page that are not used as widely to treat cancer. These listings do not imply an endorsement on the part of The Cancer Cure Foundation. They are included because of their popularity and are for informational purposes only. The Cancer Cure Foundation does not recommend the abandonment of conventional therapies in favor of alternative therapies. That is a matter of personal choice based upon one's view of the nature of cancer. You should exercise caution before using any cancer treatment, whether conventional or alternative. Alternative treatments for cancer have a history of curing cancer and it is this fact that big pharma wants to hide from the American public. Historically, many successful approaches have been developed for curing cancer. Some involve the use of herbs, minerals, oils, aromatic essential oils, dietary modifications, enemas, and the use of various types of equipment that destroy cancer cells while stimulating a natural immune response to cancer. Some people turn to alternative cancer treatments after it has become clear that conventional treatments are not working. Other people just skip conventional treatments altogether and go directly to safer alternatives. The remainder of this article is divided into three sections.
