Collected Papers V: 1993 - 1999. Serge Lang. Publisher [] I have always been a fan of collected works volumes. Even in a time of easy electronic access to many journals, it can be hard to find a copy of a seminar paper or something that appeared in an obscure venue, so these volumes provide access to important papers. By bringing together all of a mathematician's work, such books help identify dominant interests and themes. And, of course, they have an archival function, since paper, after all, is something we know will survive the centuries, hope as we must that all the material in electronic format will survive as well. Serge Lang was, of course Collected Papers, Volume V book. Read reviews from world's largest community for readers. Serge Lang (1927-2005) was one of the top mathematicians of our... Contents. initially presented in Chapter 24 (1993) and applied in Chapter 25 (1995). Another forthcoming publication by Harvard Press will be the extensive Harvard lectures on Kant from which Chapter 23 (1989) is drawn, as well as Rawls's lectures on Leibniz, Hume, and Hegel.* These papers traverse John Rawls's career.

This book collects the papers published by A. Borel from 1983 to 1999. About half of them are research papers, written on his own or in collaboration, on various topics pertaining mainly to algebraic or Lie groups, homogeneous spaces, arithmetic groups (L2-spectrum, automorphic forms, cohomology and covolumes), L2-cohomology of symmetric or locally symmetric spaces, and to the Oppenheim conjecture. Armand Borel (21 May 1923 -11 August 2003) was a Swiss mathematician, born in La Chaux-de-Fonds, and served as a professor at the Institute for Advanced Study in Princeton, New Jersey, United States from 1957 to 1993. From 1983 to 1986 he also served as a professor at the ETH Zurich. = Collected Papers of Charles Sanders Peirce, volume x, paragraph y. CN x:y. = Contributions to 'The Nation' , volume x, page y.
