Chronic obstructive pulmonary disease (COPD) is an important non-communicable disease worldwide with a rising global incidence. COPD is associated with multiple co-morbidities. Patients with COPD are at increased risk of atherosclerosis and other cardiovascular events. Cardiovascular diseases are an important cause of morbidity and mortality in COPD. The present case-control study was designed to assess the relationship between sub-clinical atherosclerotic vascular diseases with COPD. It was a prospective case-control blinded observational study. There were 142 COPD patients and 124 age- and sex- Alternative Names. COPD; Chronic obstructive airways disease; Chronic obstructive lung disease; Chronic bronchitis; Emphysema; Bronchitis - chronic. Patient Instructions. Global strategy for the diagnosis, management, and prevention of chronic obstructive pulmonary disease: 2020 report. [goldcopd.org/wp-content/uploads/2019/12/GOLD-2020-FINAL-ver1.2-03Dec19\\_WMV.pdf](http://goldcopd.org/wp-content/uploads/2019/12/GOLD-2020-FINAL-ver1.2-03Dec19_WMV.pdf). Accessed June 3, 2020. Han MK, Lazarus SC. This book considers chronic obstructive pulmonary disease (COPD) not as a simple inflammation of the lung but as a systemic inflammatory disease. Beginning with epidemiological studies, etiology, diagnosis and treatment, it elaborates further, illustrating some comorbidities and associations with other respiratory diseases. As such it provides numerous improved and more comprehensive treatment methods, including drug therapies as well as some non-drug therapies. Chronic Obstructive Pulmonary Disease - A Systemic Inflammatory Disease is a valuable resource to beginning researchers, physicians engaged in clinical practice, supervisors, and basic researchers whose work includes COPD.
