

Proof Beyond A Reasonable Doubt

By Michael Horn

In the following article I will first give the numbers and dates of specific contacts between Billy Meier and the Plejaren and then an overview of the information contained in each contact. The items titled “Corroborated” show the dates and sources of the earliest corroboration of Meier’s information found by the researchers. It should be noted that Genesis III published much of the material in volumes 1 – 4 of MESSAGE FROM THE PLEIADES with the earliest copyright being 1979, the date by which almost all of the information was in the possession of the investigative team. While I present only a brief overview of the information in the specific contacts, I hope that each contact will be published in its entirety in the near future. Except where attributed to Meier, the Plejaren were the source of the information.

When reading and evaluating the information you should ask yourself when you knew, or first heard about, each piece of information. Was it before or after Meier had published it? Had you heard about it when it was “officially” discovered or occurred? Are you just learning about some of these things now, for the first time? It must be remembered that, Meier not only published the diverse information below long before any other source, most of it was published well before home computers and the internet were available to Meier for research.

Looking at the information below, which is only a sampling of what is contained in the Meier material, one sees a substantial body of evidence of impeccable credibility, sufficient to meet legal and/or scientific standards of proof well beyond a reasonable doubt. Since anyone can duplicate the results of the searches I performed that corroborated Meier’s prophetically accurate information, the scientific method applies here. Indeed, it can be said that this is an even higher standard of proof than the physical evidence, which is still attacked by skeptics and debunkers despite their proven inability to reproduce any of it. (See: **Professional Skeptics Group Proves UFOs Real!**) One can only have compassion for their dilemma, trapped as they are between denying reality and having to acknowledge some “paranormal” evidence that contradicts their deepest religious “beliefs”.

Absence of Erroneous Prophetic Information

If, as some people might think, Meier somehow guessed or fabricated all of this specific, prophetically accurate information, it would be logical to assume that there would have to be an even more enormous body of randomly generated erroneous information such as would be produced by the proverbial 10,000 monkeys banging away on typewriters on their way to, presumably, eventually type out a play of Shakespeare’s. Unfortunately for the skeptics, there simply is no such voluminous body of inaccurate work. And it’s easy to prove this since most of the information validated so far has been culled from a couple of thousand pages of the earliest English translations of the Contact Reports published by Meier primarily between 1975 and 1979, with additional information excerpted from contacts in the 1980s and 1990s. In all cases, nothing has been added or subtracted from the original texts as those who already have possessed them for many years can affirm. And, for those who don’t own the texts themselves, there are sufficient copies in circulation that it can be easily proven. Let me also add that there are still thousands of pages of un-translated German texts and some unofficial

English translations that contain additional, already published, prophetic information awaiting scrutiny.

So, as you read (and research) the following, and assuming you cannot come to another reasonable conclusion (based on the facts and evidence) than that it is credible proof beyond a reasonable doubt, please consider the possibility that the extraterrestrials, and Meier, are attempting to offer us assistance in solving the very serious problems we face.

7th Contact, February 25, 1975 and 35th Contact, September 16th, 1975:

Connection of A-bomb testing, explosions to ozone damage, high frequency “elementary radiations” unknown to terrestrial scientists, damage to Earth’s rotation, magnetic disturbances, polar displacement; contribution of bromine gases to ozone damage, penetration of UV through holes killing microorganisms, leading to disruptions in food chain, genetic mutations, other long term negative effects for humans and the planet

Corroborated: November 29, 1988, published report from Lawrence Livermore National Laboratories announced this “new discovery”: ATOM BOMB TESTING TIED TO OZONE DEPLETION, *13 years after* Meier had already published it. Consider that this damage was first mentioned to Meier during a contact on **February 4, 1956**, when he was just 19 years old, an astonishing *32 years before* the Livermore announcement. The extraterrestrial woman, Asket, specifically referred to some of the catastrophic damage done to the environment, humans and other life forms by atomic bombs. She pointed out that the great atmospheric disturbance would result in climate changes, adverse weather conditions and lead to genetic mutations in plants, animals and humans as well.

Corroborated: National Public Radio, 1991, confirmed connection between bromine gases and ozone layer damage

Corroborated: Los Angeles Times, February 24, 1992: OZONE HOLE DAMAGES FOOD CHAIN, confirming the connection between the UV passing through the ozone hole and genetic mutations and damage to the food chain.

45th Contact, February 25, 1976: Semjase (Meier’s extraterrestrial female contactor) warned him that our extraction of petroleum and natural gas from the Earth, damming of waters, construction of huge cities were major contributing factors to increased earthquake and volcanic activity

Corroborated: The Good Life-Independent Journal newspaper, June 27, 1990: EARTHQUAKES, OIL INTER-ACT

29th Contact, July 7, 1975 and 31st Contact, July 17, 1975: Specific information about Venus, unknown at the time, including: composition of atmospheric gases, surface temperatures, depth of clouds, wind speeds, atmospheric pressure, coloration, variation in terrain, etc.

Corroborated: By probes from both US (**August 1976**) and USSR (**October 1975**)

Corroborated: February 1981, USGS was producing a topographical map of Venus which, it was discovered by the investigative team, further confirmed the details Meier had published... **5 years earlier**

31st Contact, July 17, 1975: Semjase informed Meier that Mt. Chimborazo was highest mountain on Earth, contrary to Meier's belief that it was Mt. Everest

Corroborated: June 1996 issue of Earth magazine, **21 years later**

115th Contact, October 19, 1978: Meier describes existence of Jupiter's rings, says composed mainly of dust, particles, sulfur ions flung off by volcanoes on Io, describes Io as most volcanically active body in solar system, smooth, level-surfaced, no water; describes Europa as ice-encrusted; Jupiter said to have 17 actual moons (Plejaren don't consider all of Jupiter's satellites meet their standards of moons); describes nature of Jupiter's huge funnel-shaped storm

Corroborated: March 5, 1979, NASA's Voyager 1 probe discovers rings of Jupiter, Io most volcanically active body in solar system, Europa covered in ice... **5 months after Meier published information**

Corroborated: September 15, 1998, Cornell University scientists confirm particulate composition of rings from Jupiter's moons (first theorized by astronomers August 2, 1995) **Meier's information is 20 years ahead of Cornell's** (While scientists believe that primary source of particulate matter is explosions caused by meteorite strikes on moons' surfaces, Meier's information seems more accurate, i.e. matter being explosively propelled from volcanoes at speeds up to 2,300 km/hr to heights of 180 kms more likely true source of most particulate forming rings)

Corroborated: April 2003, Dr. Joseph Veverka, Chairman Astronomy Department, Cornell University, regarding my informing him of Meier's information that Io is most volcanically active body in solar system, "If he said that about Io, 3 to 6 months before, then all I can say is that he's right."

Here is an excerpt of additional information regarding the actual ancient, and as yet unknown to our scientists, origins of the rings of Jupiter:

150th Contact, October 10, 1981

Century B.C. - 13,384
Orbital Period 714 years

Quetzal: ... 'Destroyer' is moving on a collision course with Jupiter and disturbs its rotation, while it races so closely past the outer layers, that within these a gigantic storm is created in rotating manner, which reaches into the innermost layers. The mass of Jupiter breaks at the close-point to the matter of the 'Destroyer' and gathers a particle- and moon-ring around itself, which will continue to exist for millions of years, together with the original particle- and moon-ring existing already for approximately four billion years, into which the new ring will be integrated. The gigantic whirling storm, which already developed in most ancient times on the giant planet, has nothing to do with the 'Destroyer'.

At the same time, when the 'Destroyer' passes the Jupiter system, it tears an old small-size

moon of approximately 4 kilometer diameter out of its orbit which, at enormous speed flies out into the space of the SOL-system on an unknown orbital path, and is accompanied by several smaller asteroids. At first, this moon is lost on a very far orbital path, when it appears again after a long time and moves through the SOL-system - again and again, until someday it will be captured by Jupiter again and crash down on it which, according to our calculations, will be around the period of time, when the change from the twentieth to the twenty-first century A.D. will come.

Additional explanation regarding the same comet:
(Excerpt from **Contact #248, February 3, 1994**)

Billy: But now I have another question: In the contact report of Saturday, October 10th, 1981, at 3:15 A.M. Quetzal mentioned that, due to the 'Destroyer', a small moon of approximately 4 kilometer diameter was torn away from Jupiter during the year 13,384 B.C., and taken on a course which, in addition was followed by several small asteroids. The discussion revealed that, some day, this small moon would return to its point of origin again, namely to Jupiter, in order to crash down on it. The following in this reference: Earthly scientists have discovered, that presently a small planetoid of approximately 4 kilometer diameter is approaching Jupiter on a collision course, accompanied by several asteroids in its tow. According to scientific calculations, this small planetoid, called Shoemaker-Levy 9, will crash down on Jupiter by the middle of the year 1994, which will be barely behind the visible horizon from the Earth. Does this small planetoid refer to the small moon Quetzal mentioned, which went on its journey from Jupiter during the year 13,384 B.C., and which is now 'celebrating' its return to its place of origin, or does this refer to a different space missile from outer space?

Ptaah: This actually refers to the small moon Quetzal mentioned and which, with absolute certainty, will again come into the magnetic field of Jupiter.

Corroborated: July 16 through July 22, 1994

Additional information from **115th Contact, October 19, 1978**, accidentally given to lead investigator, Col. Wendelle Stevens, USAF (Ret.), shown by him to Maj. Rudolph Pestalozzi, USAF (Ret.) and Mr. O. Richard Norton, former director Flandreau Planetarium, Tucson, Arizona. Witnessed by the three men, the information was secured until after the following specific, predicted events occurred:

- Jonestown massacre (**Nov. 18, 1978**)
- Overthrow of the Shah of Iran (**Jan. 1979**)
- Soviet invasion of Afghanistan (**Dec. 1979**)
- Chinese invasion of North Vietnam (**Feb./Mar. 1979**)
- Death of Tito of Yugoslavia (**May 4, 1980**)
- Mount St Helens eruption (**May 18, 1980**)
- Abdication of Queen Juliana of The Netherlands (**Apr. 1980**)
- Assassination of Indian Prime Minister Indira Gandhi (**Oct. 31, 1984**)
- Iran Hostage Crisis (**Nov. 1979/Jan. 1981**)
- Terrorist attack on Iranian Embassy in London (**Apr./May 1980**)

1978: In a **Wasserman** publication Meier foretells launch of telescope at end of **1980s** that would make unfathomable discoveries in space, writes that a comet would be discovered in late **1980s to early 1990s** that would be named *Toutatis*, may threaten Earth in **September 2004**

Corroborated: Hubble telescope launched **April 1990**

Corroborated: 1989, French astronomers discover comet, named it...*Toutatis*, predicted to come closest to Earth **September 29, 2004**

1978, 1992: In his book, *Existing Life in the Universe*, Meier states that there are two small planetary bodies outside Pluto's orbit, he calls them Trans-Pluto and Uni, says scientists will discover in not too distant future

Corroborated: July 3, 2001, October 7, 2002, BBC reports that scientists have discovered a new planet beyond Pluto

150th Contact, October 10th, 1981: Meier discussed information concerning the 29 actual moons of Saturn, origins of moons from asteroids

Corroborated: November 2000, scientists announced discovery of 12 moons orbiting Saturn bringing the "official" total number to 28, just one shy of what Meier reported almost 20 years earlier, scientist corroborates origin of moons as likely from asteroid

215th Contact, February 28, 1987: Known as the Henoch (or Enoch) Prophecies, this contact contained a forewarning of the destruction of the WTC by terrorism, the series of worldwide wars that the US would subsequently launch and military actions involving Russia, China, France, Germany, Spain, England, Scandinavia and many Third World and other countries

Corroborated: The WTC was destroyed on **September 11, 2001**, the US has already attacked Afghanistan and Iraq as of this writing

235th Contact, February 3, 1990: Meier is told about an earthquake that will occur on February 28, 1990 in California. During this same contact the eruption of the Redoubt volcano in Alaska is predicted for the same date.

Corroborated: This was indeed the date of the Upland earthquake in California. The activity of the Redoubt volcano actually began on February 21 and continued through February 28 with more activity following in March.

241st Contact, February 3, 1992: Contained these specific **Corroborated** warnings about:

- Landslide in Brazil of **March 1992**
- Nuclear accident in Russia during **3rd week of March**, occurred on **March 27, 1992**
- Landers earthquake in L. A. foreseen **April 23rd or 24th, 1992**, occurred **April 22, 1992**
- Eruption of Mt. Etna in **April 1992**, reported **April 15, 1992**
- Eruption of Cerro Negro in Nicaragua in **April 1992**, occurred **April 9-12, 1992**
- Earthquakes Germany-Holland-Belgium area for **April 1992**, occurred **April 13, 1992**
- Earthquakes China-Burma **April 1992**, occurred Myanmar-China border **April 23, 1992**

Still speculative: 249th Contact, June 13th, 1994: (In response to question Meier asked regarding Mad Cow Disease), Ptaah stated, "BSE pathogens cannot be destroyed by simply cooking the meat and other items, or by producing meat meal", and that the temperatures

necessary for killing the disease-causing prions would need to be, “as high as 700 C (1292 F), and possibly even up to 1000 C (1832 F), for previously mutated pathogens that have existed for some time now.” Our scientists have been raising their own estimates as to the temperatures necessary to destroy the disease-causing prions and are now more closely approaching the temperatures that the Plejaren, Ptaah, stated.

251st Contact, February 3, 1995: In February of 1995, Meier published the 251st Contact, a lengthy document of enormous complexity in which he foretold the likelihood of certain specific future events. In September 2001, portions of that information were included in the book “And Yet They Fly!” written by Guido Moosbrugger, an Austrian former schoolteacher and principal acquainted with Meier for about 25 years.

The following seven items, foretold on pages 347 and 348 of “And Yet They Fly!” have recently occurred and virtually in the sequence Meier foretold:

1. The strike or attack by the US and its president (Iraq). Meier even used the word “stun” when he said the strike would “...stun the entire world...” “Stun” is a synonym for the term “shock” used by the US as in “shock and awe”.
2. Meier correctly predicted the following upsurge in unrest and violence from Islamic fundamentalists.
3. Meier foretold the spread of AIDS, which has indeed become very widespread.
4. Mad Cow Disease has since spread to other animals and humans as Meier also predicted.
5. Meier said that a new disease and epidemic would then appear and SARS did just that.
6. His warning regarding a renewed threat of chemical warfare is more in the news than ever.
7. Meier specifically warned of the possibility of an accident, one that he said could be avoided, however, at the nuclear power plant near Lyon, France. The emergency scenario, and the timely shut down of that exact plant, occurred on August 12, 2003.

Now, in case the astronomically high odds against any kind of coincidences or lucky guesses aren’t apparent, consider that Meier identified the following eight years in advance:

1. The exact country and leader (out of hundreds) that would launch a stunning attack and a synonym for the term actually used by that country’s leader (impossible to calculate).
2. The exact religious group (out of thousands) that would respond with their own attacks.
3. The exact disease (out of thousands) that would spread widely among humans.
4. The exact animal disease (out of thousands) that would spread to other animals and humans.
5. The sudden appearance of a new disease and epidemic.
6. The exact kind of weapons and warfare that would cause renewed threats.
7. The exact location (out of 436) and type of facility (out of several) that would have a near-accident.

The 251st Contact also contains startling information regarding technological developments such as hybrid warriors created by mixing humans and pigs’ DNA; people will have bio-chips attached to their nerve endings, Meier warned of ominous bio-chipping with links to DSP satellites and super-computer

Corroborated: Human-pig DNA experiments begun in last several years. December 22, 2000 article from SiliconValley.com: “Patent # 348487398: Creature ‘97% human, 3% pig’: A

coterie of British researchers has *reportedly* managed to create an **embryonic pig-human hybrid** by inserting human DNA into a pig's egg cell. While it's unclear whether or not the embryos could have been grown to term, researchers suggest that they might have developed further had they been implanted into the womb of a human, *or pig* mother. It is, of course, foolhardy to speculate on just what sort of creature might result from this...Moreauian effort. Still, the Sunday Times does note that the hybrids the researchers created 'would be much more human than pig because about 97% of DNA is in the nucleus, which was human. There would, however, be some effect from the 3% of DNA from the pig.' The process has been submitted to the European Patent Office, presumably for cloning research.'"; regarding bio-chips, people are already starting to get "chipped"

Still speculative: Creation of half-human/half-machine beings, clones and androids, discoveries that conclusively confirm existence of previous human life on Mars, rectification of the "aging" and "aggression" genes, Plejaren warnings of deep impact scenario, need for a defense system for incoming objects

What Does It Mean to Us?

The universe, and everything in it, is governed by unalterable laws, basic among them is the law of cause and effect. Once the pendulum is sent out on its way, it will eventually return with the predictable result. The law always fulfills itself, in its own timing and its own way.

Meier and his extraterrestrial friends seem to be able to predict, i.e. accurately calculate, the results of known to them causal actions originating from humanity and/or nature and the cosmos. And they have made it clear that certain prophesied (undesired) events can still be changed for the better...if humanity recognizes its errors and makes sufficient effort in the correct, positive direction to alter those outcomes that can still be changed. Prophecies refer to those events that are the likely outcome of causes put in motion that are still alterable, to some degree. Predictions refer to those events that, for a number of reasons, will occur with certainty. Some predictions are simply prophecies that have gone past the point of no return.

In the **215th Contact**, known as the Henoah Prophecies, special emphasis was placed on America and the very times we are in. (These prophecies will be contained in the book "And Still They Fly!") More recent comments by Meier have also carried harsh and heavy warnings about the current American administration and leadership and the danger of its leading the world into a cataclysmic Third World War. Considering the credibility the Plejaren have established with their track record of impeccable accuracy since at least 1975, it would be wise of us to consider their future warnings with great seriousness.

Of course, it is up to each interested person to do the research necessary to determine the accuracy and authenticity of the Meier Contacts for themselves. Should the most important event in human history, contact between an Earth human and extraterrestrial humans, actually have occurred, then we might realize that this is less about UFOs and extraterrestrials than it is about us...and our future survival.

What Does Proof Beyond a Reasonable Doubt Mean? Why the Guilty Sometimes Go Free and Why That's Not Always a Bad Thing. Share. Over the years, legal authorities have generally agreed that proof "beyond a reasonable doubt" requires jurors to be at least 98% to 99% certain that the evidence proves the defendant to be guilty. This is in contrast to civil trials on lawsuits, in which a lower standard of proof, known as a "preponderance of the evidence" is required. Proof beyond a reasonable doubt in a legal sense means the reasonable doubt of an "average person." In the US a trial is an argument that is presented to a judge or a judge and jury. The null hypothesis in a criminal trial is that the defendant is innocent. A scientific theory is accepted if the evidence implies that it's true beyond a reasonable doubt. But there's a bigger difference. Proof at law tests an assertion that a specific event in the past occurred in a certain way. Beyond a Reasonable Doubt "The evidence presented by the prosecutor in a criminal trial proves the defendant's guilt to such a degree that no reasonable doubt could exist in the mind of a rational, reasonable person. The reason the burden of proof in a criminal trial is so strict is that, while a civil trial may result in the defendant being ordered to make monetary payment, a criminal conviction may result in the defendant being deprived of his freedom, or even in his death. Reasonable Doubt in Practice. In a 1995 trial that lasted nine months, former football player O.J. Simpson was accused beyond a reasonable doubt" adj. In a criminal case, proven by evidence to the point that a reasonable man or woman would be entirely convinced and morally certain that the defendant is guilty. The Essential Law Dictionary. proof n [alteration of Middle English preove, from Old French preuve, from Late Latin proba, from Latin probare to prove] 1: the effect of evidence sufficient to persuade a reasonable person that a particular fact exists see also evidence 2: the Law dictionary. doubt v. To question or hold questionable II n. Uncertainty of mind; the absence of a settled opinion or conviction; the attitude of mind towards the acceptance of or belief in a proposition, theory, or statement, in which the judgment is not at rest Black's law dictionary. The phrase "beyond a reasonable doubt" reflects the highest standard when it comes to burden of proof in a legal trial. When a case must be proved to this standard, it means that if a reasonable person were presented with the evidence, he or she would draw the inescapable conclusion, without any doubt, that the accused was guilty of the crime. If there are doubts or alternative explanations for the evidence, this standard of proof is not met, and a conviction could not be returned. Many nations require that cases be proved beyond a reasonable doubt when they are criminal in nature, due to the severity of the crime someone stands accused of. For civil cases, there are usually different standards of proof that are less demanding.
