NEERAJ. 145 - 155. 34. Commentaries, which include perspectives and contemporary issues, are sought to offer a balance of viewpoints and scholarly opinion on a broad array of drug-related topics. Case reports, which remain a vital part of our mission, offer clinically valuable lessons. All manuscripts are peer reviewed by independent clinicians or scientists for clinical relevance, technical accuracy, methodological rigor, clarity, and objectivity using a blind review process. In addition to feature articles published monthly, each issue of Clinical Therapeutics features a specific theme section dedicated to an annu issue to consider: the resulting reflections are also important. A lot of time is spent polishing and â€œmaking-upâ€” surfaces, that are architecturally visible. In FSW prefabricated panels, the reflections derive merely from the surface appearance of the aluminium plates and profiles in the as-delivered state, not from the reflections caused by welding heat input.Â Figure 21. Modular LEGIO 5UT friction stir welding machine for flexible manufacturing. The working envelope of this particular equipment is 6000x500x300mm (x-, y-, z- axis).
