He went on to say that the demand for language-lessons on a conversational basis was rapidly increasing, not only in England, but all over the world - and that there was apparently not a single book yet in existence which gave clear and precise indications to teachers as to how such a course should be conducted; it was left to each individual teacher to work out his own system, good, bad or indifferent. The idea very naturally appealed to me; I realized how much I should have welcomed such a book in my early teaching days, and how helpful it would have been to me...

Functional methods of the oral approach or situational language teaching. The oral approach was developed from the 1930s to the 1960s by British applied linguists such as Harold Palmer and A. S. Hornsby. It advocates teaching of oral skills at the expense of every traditional aim of language teaching. According to this method, printed language and text must be kept away from second language learner for as long as possible, just as a first language learner does not use printed word until he has good grasp of speech. Lessons begin with a dialogue using a modern conversational style in the target language. Material is first presented orally with actions or pictures. The mother tongue is NEVER, NEVER used. There is no translation. The oral method of teaching languages, a monograph on conversational methods together with a full description and abundant examples of fifty appropriate forms of work.
