Which assessment question should the nurse ask next? 1. "Have you noticed a yellow haze when you look at things?" 2. "Does the pain get worse when you eat a meal or snack?" Pancreatic cancer begins in the tissues of your pancreas — an organ in your abdomen that lies behind the lower part of your stomach. Your pancreas releases enzymes that aid digestion and produces hormones that help manage your blood sugar. Several types of growths can occur in the pancreas, including cancerous and noncancerous tumors. The most common type of cancer that forms in the pancreas begins in the cells that line the ducts that carry digestive enzymes out of the pancreas (pancreatic ductal adenocarcinoma). Pancreatic cancer is seldom detected at its early stages when it's most cur Survival Rates for Pancreatic Cancer. Questions to Ask About Pancreatic Cancer. Cancer A-Z. Pancreatic Cancer. Early Detection, Diagnosis, and Staging. Questions to Ask About Pancreatic Cancer. It's important to have honest, open discussions with your cancer care team. They want to answer all of your questions, so that you can make informed treatment and life decisions. Here are some questions to consider: When you're told you have pancreatic cancer. What kind of pancreatic cancer do I have? Has my cancer spread beyond the pancreas? What is the stage of my cancer?
