ABSTRACT The use of argumentation in science education is associated with many benefits. Some of these include developing critical skills, promoting spirit of enquiry, enhancing conceptual understanding and improving academic performance of students. This research will discuss the strength of using scientific argumentation in science education. The findings from other such studies will also be critically reviewed to seek an in-depth understanding of the use of argumentation in teaching and associated challenges. The research would help in improving the use of argumentation in teaching and exploring solution to problems and challenges associated with this method. - Wendy Saul Author of Science Workshop The best way to transform students' scientific thinking is by transforming their science writing. Writing is thinking and with Negotiating Science you'll move from rote procedures to the kind of writing that real scientists do. Your students will learn to negotiate meaning from the results of their work and to argue for their ideas - posing questions, documenting evidence, making claims, and sharing data.
